The Coco Team x

ESPA Treatments

Our facials begin with a detailed consultation and in-depth skin analysis using SkinVision™ technology to identify skin conditions not visible to the naked eye. Your facial is specifically tailored to you, and will include cleansing, exfoliation, steam and extraction where necessary, and a treatment specific massage, mask and intensive serum. Finally, skincare products are chosen for your individual needs to achieve the best possible results.

To maintain the ultimate healthy radiant skin we recommend a facial once a month.

Osteopathy

Osteopathy is a unique system of massage, stretching and manipulation designed to improve body alignment, joint mobility and impaired conditions of soft tissues (such as muscles, tendons, ligaments and fascia)- and disorders due to trapped nerves. Osteopathy is also a way of detecting, treating and preventing health problems, based on the principle that the wellbeing of an individual depends on their bones, muscles, ligaments and connective tissue functioning smoothly together.

Cranial Osteopathy is the application of light/therapeutic pressure on your head and sacrum. This gentle and effective technique helps assist the respiration (or Primary Respiratory Mechanism) of any lost micro movements of the bones, membranes and structures related to the cranium. It aims to beneficially affect the nerve receptors that lie within the joints of the skull (i.e. cranial sutures) and the circulation of cerebrospinal fluid. Ultimately, it's objective is to guide your whole body towards a healthier midline, better function and self-healing. This practice is also known as Cranio-Sacral Therapy as it assists your body in improving the involuntary mobility of the sacrum between the ilia and the sacrum with the cranium, as well as promoting the overall synchronicity of your body. It is very relaxing and helps all the structures in your body feel connected!

First Initial consultation (60 mins) £90

Please note that your first treatment with the Osteopath will include:

- 20 to 30 minutes taking a detailed medical history, including past and present symptoms and injuries,
- 10 to 15 minutes of thorough postural, joint and muscle assessment and specific tests to rule out any underlying medical conditions.
- 15 to 20 minutes of treatment. The osteopath will also give advice and exercises to help you recover. It is often better to not over-treat; Therefore 20 minutes is more than enough to tackle the issue(s) and to benefit from treatment as much as possible and let your body heal.

Follow up consultation (40 mins) £60

Includes: 10-15 minutes of examination and between 25 – 30 minutes of treatment.

Physiotherapy

Physiotherapy aims to help someone overcome pain and improve function using mainly 'active approaches' (where patients are actively engaging) such as rehabilitation, movement re-education, exercise therapy but also some 'hands on' techniques

Acupuncture

Acupuncture & Traditional Chinese Medicine (60 mins) (TCM centuries old effective natural and holistic treatments)	£75
---	-----

Acupuncture heals your body based on the theory of smooth a flow of blood and energy (Qi) to be disease free, produce dopamine and endorphin hormones, reduce inflammation and pain.

According to Chinese theory, we're made up of the 5 Elements: Wood, Earth, Metal, Fire and Water. They're our creative and controlling energies and ideally should all be in balance. The Elements out of balance are known as the causative factor and become apparent in many ways. The causative factor is a POSITIVE thing. When you come for treatment and you're out of balance, then these problems will become evident to the trained practitioner. Your 5 Element Acupuncturist will be able to diagnose problems within you by evaluating your colour, sound, odour or emotion. This enables them to put together a treatment plan that will treat your causative factor or what Element you represent. This ancient system enables the body/mind/spirit to heal itself, as far as nature will allow. This principle of traditional acupuncture is important, because it means the underlying cause of the disease is being dealt with rather than the symptom merely being swept under the carpet, only to reappear in the future. Not only dealing with your condition by restoring the overall balance of energy, 5 Element Acupuncture may help you to feel better in a general way, by promoting an improved quality of life.

Cosmetic Acupuncture	60minutes	£120
----------------------	-----------	------

is a totally natural and holistic anti-ageing treatment that aims to reduce fine lines and wrinkles. Cosmetic Acupuncture, in contrast, will require a course of treatment to show pronounced results. However, the whole face is treated and as body points are also used, a patient's health and wellbeing can be greatly improved by undertaking a series of treatments. Facial patients often report that they feel healthier, sleep

better, have brighter eyes and feel more balanced; those are the kind of side effects we like! The acupuncture points and the way that they are used in a Cosmetic Acupuncture session have all been chosen specifically with this overall achievement of wellbeing in mind. This treatment also works on lifting the face, particularly where the face begins to sag around the 'jowls' and the cheek area, rather than simply targeting wrinkles. Studies published in the International Journal of Clinical Acupuncture in 1996 showed that of 300 people who received Facial Acupuncture, 90% demonstrated marked results after only their first treatment. Over a course of treatments you can not only expect to be looking more radiant, but you will also start to feel more at balance and happy within yourself

Follow up consultation (40 mins)	£60
Includes: 10-15 minutes of examination and between 25 – 30 minutes of treatment.
